

**Project Prometheus**  
Questionnaire

**WHY YOUR ANSWER HELPS**

<p><b>1</b> Does your budgeting/purchasing department use the internet, a catalog or a local source to obtain product pricing information?</p>	<p>This tells us how you do things now.</p>
<p><b>2</b> Would it help to be able to use the internet to obtain product pricing, especially if all the information needed is on one site?</p>	<p>This tells us if we are on the right track.</p>
<p><b>3</b> If your budgeting/purchasing department has more than one purchaser, how are responsibilities divided?</p>	<p>This tells us how to organize the products in the database.</p>
<p><b>4</b> Does your department carry any inventory? If so, would it help to be able to track it on this site?</p>	<p>This helps when determining our programming needs.</p>
<p><b>5</b> What items or equipment do you buy most frequently?</p>	<p>This helps with web site design and quick access buttons.</p>
<p><b>6</b> Would it help to store and access your firefighters' size information on this web site? For example: boots, gloves, turnout gear.</p>	<p>This helps to determine what data is worth retaining for future use.</p>
<p><b>7</b> Please list a contact or contacts (if budgeting/purchasing responsibilities are divided) we can use, if we need more information.</p>	<p>These contacts would help with our feasibility testing.</p>
